## Hyperdermic Needles -

BD PrecisionGlide Needles are available in a wide range of gauges, lengths, and bevel designs. The large inner diameter of thin wall needles is designed to allow the use of a smaller gauge size with increased flow rates over regular walled needles. Thin wall needles are also designed to facilitate the injection of high-viscosity fluids.

## PT/INR

By directly detecting the clot, the Coag-Sense system avoids the challenges that plague other systems that use secondary means of clot detection like monitoring changes in impedance or pressure. For example, the concentration of red blood cells or other substances in blood sample can affect results in the measurement process of those products.

## Lipid Profile Testing -

The Lipid Profile cassette measures total cholesterol (TC), a measure of the total amount of cholesterol in the blood, high density lipoprotein (HDL) cholesterol ("good cholesterol") and triglycerides or TRG (fatty acids and glycerol that circulate in the blood and are stored as body fat). Lipid Profile also calculates the TC/HDL ratio, non-HDL cholesterol, and estimates the level of LDL cholesterol ("bad cholesterol"). For use with the Alere Cholestech LDX® System.
